Experience

Software Developer

Starting: June 2018

John Hancock/Manulife

Student Technology Consultant

Fall 2014-Spring 2016, Fall 2017-Spring 2018

Boston College (ITS)

- Assisted faculty, staff and students with software and hardware issues across different operating systems including Windows and Mac OS X.
- Collaborated when necessary with TCs on problems requiring more specialized technical skills.

Software Engineering Intern

Summer 2013, 2014, 2016, 2017

Massachusetts General Hospital (Lab of Computer Science)

- Implemented new features for an internal platform using the Django Framework
- Developed a mobile-friendly Django application to help medical residents track their achievements as they progress through their programs.
- Built and maintained several departmental websites.

Student Software Engineer

Fall 2016

Boston College (EagleApps)

- Contributed in the development (Java) of many services utilized by the Boston College community.

Software Engineer

Fall 2016

For a Living Project

- Helped during the early development of a Django project containing most of the project's core services.

Undergraduate Research Fellow

Spring 2016

Boston College (Physics)

- Built LabVIEW Virtual Instruments (VIs) to control instruments used during experiments.
- Upgraded many outdated VIs to more recent versions of the software.
